

## **2009-2010 H1N1 Billing Protocol**

NHPRI has adopted the following billing protocol for network providers who are administering the H1N1 vaccine to our members.

When submitting a claim for reimbursement, please use the following coding:

90470 H1N1 immunization administration (intramuscular, intranasal), including counseling when performed

90663 Influenza virus vaccine, pandemic formulation, H1N1

Note: In order for the administration code 90470 to be reimbursed, providers must submit the code 90663 with a 0.00 charge or 0.50 charge. Claim submissions without both codes will result in a denial of payment on 90470.
